Abstract (en)
[origin: EP2305929A2] The lock has a lock trap (1) displaceable in an opening position, a main closing position and a pre-closing position. The trap is engaged with a lock striker (6) in the main closing position and the pre-closing position, and includes an inlet opening (7) with a corresponding engaging surface (8). The trap is provided with a metallic base body (9) and covered with a damping material for reducing engaging noises between the lock striker and the trap. The trap includes an engaging sheet metal (10), which provides a part of the engaging surface for the striker and is made of leaf spring steel.
