Abstract (en)

[origin: EP2306405A2] The tachograph arrangement has a tachograph and a sensor arrangement for detecting a parameter for driving condition of a vehicle. The sensor arrangement has two sensors (2,3), where the latter sensor is arranged adjacent to the former sensor. The former sensor is stand in connection with a digital data producing device (12). The digital data is produced directly or by an operating unit for operating sensor signals of the latter sensor.
