Abstract (en)
[origin: WO2010004175A1] The protective piece (1) against the visible transfer of bodily secretions is designed to be included inside a piece of clothing in a determined region thereof, comprising a material (2), with two faces (3,6) formed of interleaved threads (4,5,7,8) connected to each other. The outer face (6) of the material (2) at least partly acts as impermeable outer layer, designed to come into contact with the article and comprising threads of a synthetic material. The material (2) comprises so-called storage threads (10), of an absorbent material, which can store humidity and are not or barely apparent at the outer face (2). The inner face (3) of the material that is to say that which will be closest to the wearer of the article, comprises threads (5) for the absorption and/or the transfer of the humidity to the storage threads (2).
