Abstract (en)

[origin: WO2010064081A1] The present invention is related to a seat backrest inclination adjustment assembly (1) which enables the user to adjust backrest inclination of the seat in vehicles by spending less effort and keeps the locked position of it without the need to an additional system even in sudden speed changes. The operation of the system is based on a four-bar mechanism and due to a special position of the four-bar mechanism, high mechanical advantage is obtained.
