Abstract (en)

[origin: WO2010012776A1] A switching device (1) for a vehicle having an electronic immobilizer comprises at least one part (2) which is mounted fixedly in relation to the vehicle and at least one sensing device (3) which can move relative to the fixedly mounted part (2). Said switching device (1) also comprises at least one induction coil (10) which is provided for communication with a transponder which is integrated into a portable device, wherein the induction coil (10) is at least partially integrated into the movable sensing device (3).
