Abstract (en)

[origin: WO2009090314A1] The invention relates to light structures for the total video monitoring and the remote control of the system, and for the pre-recording of access badges, characterised in that they include booths to be placed on the ground, or slightly above the ground, that comprise a control or survey room oriented towards the outside and, adjacent thereto, 1 to 7 turnstiles or rotating drums oriented towards the entrance or the exit and arranged on a platform that is optionally covered by protection means and provided with signalling panels.
