Abstract (en)
[origin: WO2010015223A1] The invention relates to a slide ring and/or stationary seal ring of a running gear seal, comprising a base body having an angular cross-section, an axial limb used to receive a spring element, and a radial limb provided with a running surface extending over a predeterminable height, wherein at least the running surface is provided with a corrosion protection layer, which at the same time forms the sliding layer.
