Abstract (en)
[origin: EP2309048A1] The drum (3) comprises a cylinder-like cladding (10), which is bordered by two end walls lying opposite to each other. The drum is mounted over a horizontal or inclined angle in a water container in a rotating manner. A serration (21) has a lateral surface (22) with a convex curve, where the serration extends from a lateral area (10a) running out to a free end of the serration. The lateral surface has a bead-like molding.
