Abstract (en)

[origin: EP2309089A2] The device has a fixing element (24) for connecting a component with a support element (23) that is attached at an edge of the building opening. The fixing element is formed as a threaded bolt which is fixed in an oblong hole or in round hole of support element by a screw connection (25). The screw connection, the oblong hole or the round hole is assigned to thermal separating units (29,30). The thermal separating agent is made of a plastic material or a rubber material.
