Abstract (en)
[origin: WO2010010005A2] The object of the present invention is an oil-in-water emulsion comprising solvent (A), water (B), surfactant (C) and at least 2 wt.% pesticide (D) based on the emulsion, wherein the solvent contains an aromatic hydrocarbon (a), and a ketone (b). The invention further relates to a method for producing an oil-in-water emulsion in that solvent (A), water (B), surfactant (C) and at least 2 wt.% pesticide (D), based on the emulsion, are mixed together. Other objects include an agrochemical formulation comprising the emulsion according to the invention and other auxiliary materials; a method for combating phytopathogenic fungi and/or undesirable plant growth and/or undesirable insect or mite infestations and/or for regulating the growth of plants; a method for combating undesirable insect or mite infestations on plants and/or for combating phytopathogenic fungi and/or for combating undesirable plant growth; also, seeds treated with an agrochemical formulation according to the invention.
