Abstract (en)
[origin: WO2010007043A2] The invention relates to a cartridge (1) for free-flowing washing or cleaning agent for application in a dosing device (2), comprising a number of chambers (3a,3b,3c), for physically separate housing of different preparations of a washing or cleaning agent, a cartridge base (4) which, in the active position faces downwards in the direction of gravity and at least two chambers (3a,3b,3c), each comprising at least one outlet opening (5a,5b,5c) arranged on the cartridge base (4), wherein the cartridge (1) is made of at least two elements (6,7) with a material connection, wherein the connecting edges (8) of the elements (6,7) run on the cartridge base (4) outside the outlet openings (5a,5b,5c), hence the connecting edges (8) neither intersect nor touch the outlet openings (5a,5b,5c).
