Abstract (en)

[origin: WO2010007634A1] A shower head (4) comprising a closure element (8), a supply plate (12) provided with at least one supply hole (16), and at least one supply nozzle (24) joined to the supply hole (16). The supply nozzle (24) is configured so as to make it possible to extract and re-insert it in the supply hole (16) directly from the outside of the shower head (4); this way it is possible to replace an individual supply nozzle (24) obstructed by lime-scale without ever having to open and dismantle the shower head (4).
