Abstract (en)
[origin: WO2010012590A1] A composition comprising: i) encapsulated perfume components, ii) a fabric softening active, iii) a stabilising active selected from the group consisting of from 0.05 to 0.2 wt% by the total weight of the composition of water soluble cationic quaternary ammonium compound (s), from 0.65 to 1.5 wt % by the total weight of the composition of non-ionic surfactant (s) and mixtures thereof, and iv) from 0.005 to 0.1 wt% by the total weight of the composition of salt, wherein the encapsulates comprise a capsule wall having surface weak acid groups or moieties, allows the formulation of stable fabric conditioning compositions.
