Abstract (en)  
[origin: WO2010015627A2] The present invention relates to a mutant microbial strain derived from a parent microbial strain capable of producing an N-adipoylated  $\beta$ -lactam compound when cultured in a medium comprising adipic acid characterized in that the mutant microbial strain has an improved incorporation of the adipic acid from the culture medium into the N-adipoylated  $\beta$ -lactam compound.
