Abstract (en)

[origin: WO2009156492A1] The invention relates to a connection arrangement (1) for a sanitary fitting (2), the sanitary fitting (2) being connected to at least one water line (4) ending in a wall (5) of the building, by means of a connection device (6) arranged in or on the wall (5) of the building and comprising at least one inner water channel (7). The sanitary fitting (2) is connected to the connection device (6) on a sanitary object (3) fixed to the wall (5) of the building. The sanitary object (3) comprises a first opening (10) which connects a surface of the sanitary object (3) to a cavity (9) located behind said surface, which is open, by a second opening (11), towards the rear of the rear side (12) of the sanitary object (3), on the wall (5) of the building. A first part (13) of the connection device (6) is arranged in the wall (5) of the building and a second part (14) of the connection device (6), connected to the first part by means of the at least one inner water channel (7), protrudes through the second opening (11) into the cavity (9) of the sanitary object (3). The sanitary fitting (2) is connected to the second part (14) of the connection device (6), through the first opening (10) of the sanitary object (3). The invention also relates to a connection device (6) for such a connection arrangement (1).
