Abstract (en)  
[origin: WO2010002293A1] The present invention relates to a cooling structure for an internal combustion engine piston. Said piston comprising an oil cooling channel integrated in said piston. Said oil cooling channel having a bottom surface facing towards a top surface of said piston and a top surface facing away from said top surface of the piston. Said oil cooling channel is provided with an oil inlet and an oil outlet which are laterally separated from each other. Said bottom surface and/or said top surface of said oil cooling channel is slanted relative to a central axis of a wrist pin opening provided in said piston.
