Abstract (en)

[origin: WO2009103132A1] The computerized device for sale of goods and/or services comprises the banknote validating device (1) connected to the computer (2) through connection (11) and the POS terminal (13) coupled to the computer (2) through connection (14). The computer (2) contains a processor with x86 processor architecture or processor with RISC processor architecture and is equipped with appropriate software to control the signals, and is connected to the memory (4). The computer (2) is further coupled to a console part which, depending on the specific embodiment, may consist of a display (6), a keyboard (5) and/or a printer (7); the computer is further connected to executive devices (9) that may be more than one and to a change return device - banknote dispenser (12). The device may be used in all fields of human life where it is preferable to avoid human interference in the sale of goods and/or services.
