Abstract (en)

Accessory element (1) for spike heel (T), characterized in that it comprises a platform (2) that houses the tip (3) of said heel, a support wall (4) for said heel placed at the periphery of said platform (2), and means (5, 6, 7) for detachably fix said heel (T) to said platform (2), said fixing means (4) being configured to permit the fixation of said heel (T) next to said support wall (4), so that the tip (3) of the heel is placed off-centered in the platform (2) to make minimum the torque momentum that receives the platform (2) when walking. With these features the stability and comfort of the user when she walks on soft grounds is enhanced and a detachable accessory element is obtained.
