Abstract (en)
[origin: EP2311757A1] The container has a rectangular steel frame structure with two front walls, where one of the front walls is provided with a bulk flap (16). A side wall of the structure is constructed in a closed and fixed manner. A container roof (5) is provided with a filling opening (7) for loading free-flowing or powdered goods, where the opening is closable by a dome cover (6). Another side wall (9) of the structure is formed by two revolving doors (10, 11), which respectively consist of outer door wings and inner door wings. The wings are outwardly rotatable in a same direction when the doors are opened.
