Abstract (en)

[origin: EP2312045A1] The machine (1) has a cabinet enclosing a washing tank (3), and a washing and/or rinsing water reservoir (6) located external to the cabinet, where the reservoir includes a vent device (49). The vent device has an air flow tube (46) connected to a zone (48). The zone is placed in fluidic communication with the washing tank. An air passage opening (47) of the vent device is provided in a hydraulic water distribution circuit connected to the tube. A water circulation pump (12) is located in a lower point of the reservoir.
