Abstract (en)
[origin: EP2312084A2] The railing (10) has panels i.e. glass disks (16), arranged between posts (14), and clamped by the posts. One of the posts contains a tubular cross section with a transverse wall that is fixedly connected with a wall of the posts. A longitudinal slot is provided in the wall of the posts such that an edge region of the panels is pushed through the longitudinal slot and is arranged in an inner space of the posts. The wall of the posts and the transverse wall are connected with each other as a single piece.
