Abstract (en)

[origin: EP2312102A2] The device (6) has a sensor element (9) for generating a radio signal and comprising a voltage generator. A switch pin (10) is movable by actuation of an espagnolette fitting. An actuating device (11) actuates the sensor element. The actuating device has a slider (15) that is extended into a movement region of the switch pin during actuation of the espagnolette fitting and connected with the sensor element by a lever (14). The lever is coupled with the slider by a control cam (19), where the control cam is arranged perpendicular to a movement direction of the slider.
