Abstract (en)

[origin: WO2010007346A1] A stand alone letterbox lock, or restraining device for the flap of a letterbox comprising: a support member which, in use, is securable adjacent a letterbox assembly or letterbox; and a stop member supported by said support member and extending from the support member, wherein the position of the stop member relative to the letterbox flap is adjustable such that, in use, at least a portion of the stop member can restrict the degree by which the letterbox flap can open.
