Abstract (en)

[origin: WO2010013106A1] A container (1) for fluid products, particularly pharmaceuticals, cosmetics, foodstuffs or the like, comprises a hollow body (2) for containing at least a fluid product, a neck (4) which extends from the body and which has at least a dispensing mouth for dispensing the product, and closing means (8) with a handle (9) which integrally supports at least a shutter element for shutting the dispensing mouth, the closing means comprising an annular collar (12) which is associated with the handle along at least a pre-established breaking area (13) and which is associable with the neck, the container further comprising a partition defined inside the body and suitable for subdividing the inner volume of the body in at least two compartments suitable for containing two fluid products, the neck having at least two dispensing mouths which (5,6) are closable by at least two shutter elements (10,11) respectively.
