Abstract (en)
[origin: WO2010017651A1] The invention relates to an emulsifier comprising a hydrophilic polyester, the terminal position of which is covalently extended by a hydrophobic part, such as fatty alcohol, long-chained 1,2-alkyl epoxy, polycyclic alcohol. Furthermore, a method for producing such an emulsifier is described, and also various uses of such a surfactant, particularly as an emulsifier in the cosmetics sector.
