Abstract (en)

[origin: WO2009156835A2] This invention relates to an assembly consisting of a selection body (2) and at least one guiding body for a shed forming device for a weaving machine, the selection body comprising one or more positioning lips (11) in order to position the selection body (2) between guiding bodies placed next to one another, each guiding body comprising two legs (1) which have a free end between which a printed circuit board (PCB) can be mounted as a support of one or more selection bodies (2). This invention also relates to a hook selection device for a shed forming device for a weaving machine, more specifically a Jacquard machine provided with a selection body (2) of this type.
