Abstract (en)  
[origin: WO2010004188A2] The invention relates to a door (200) for a swimming pool house (A) which is noteworthy in that the adjacent uprights (320 and 330) of the panels (300) which form the door leaves are equipped with means for transmitting rotational movement by contact in order firstly for the pivoting movement of one panel (300) to cause all the panels (300) to pivot and to fold back or open out all of the leaf (210) and secondly for the movement of one panel (300) with respect to another not to create a space between the panels (300). This door is noteworthy in that the uprights (320 and 330) of the panels are equipped with a driving member in the form of a pinion extending the full length of the upright (320 and 330).
