Abstract (en)
[origin: WO2010018024A1] The invention relates to an injection valve member for a fuel injector (1), which injection valve member is of multi-part design and comprises different functional regions. To reduce the production costs for a fuel injector having an injection valve member (30), the injection valve member (30) comprises two guide bodies (31, 32) which are fastened to a separate connecting rod (34).
