Abstract (en)
[origin: WO2010007048A2] The invention relates to a household appliance comprising a stationary device front and a device door (6) that can rotate about a stationary rotational axis and that is arranged at a defined distance from parts (5) of said device front. In order to maintain an adjustable, defined distance, at least one spacer (11) is arranged between the parts (5) of the device front that are adjacent to the closed device door (6) and the adjoining device door (6), said spacer being supported on at least one part of the stationary device front and on hinged parts of the rotational axis (7) of the mobile device door (6).
