Abstract (en)  
[origin: WO2010000866A2] The present invention relates to a cooling device (1) that comprises at least one cabin (2) wherein articles to be cooled are placed, one or more doors (3) allowing access into the cabin (2), at least one evaporator (4) that cools the interior volume of the cabin (2) by absorbing the thermal energy, at least one drip tray (5) for collecting the water resulting from melting the frost accumulated on the evaporator (4), at least one heater (6) that vaporizes the water in the drip tray (5) by heating and a control unit (7) that determines the operating time of the heater (6) (theater).
