Abstract (en)
[origin: WO2010011199A1] An electronic communications device such as a key fob is provided, and in some embodiments comprises a flexible film and a spacer layer defining at least one aperture. The flexible film can cover at least a portion of the spacer layer, and defines an exterior surface of the key fob. The flexible film includes at least one contact surface and a surface adjacent to the at least one contact surface. The at least one contact surface flexes when a force is applied in order to actuate at least one switch.
