Abstract (en)

An electric household appliance (1), e.g. a professional dishwasher, including a substantially parallelepiped supporting casing (2) defining a working chamber (3) therein which may be accessed through a front door (4) and provided with at least one receiving guide (5) for an either fixed or sliding supporting element, wherein at least one side wall (6,7) of the supporting casing provided with the guide is delimited inside and outside the supporting casing (2), respectively, by first and second opposite faces (8,9) of a same, substantially flat sheet element (10) provided with at least one embossment (11) defining said guide (5) by means of a convexity thereof overhangingly emerging from the first face (8), and a cup-shaped cavity (12) exposed from the second flat face (9) by means of a concavity thereof; the cup-shaped cavity (12) being plugged by a second, substantially flat sheet element (13), peripherally glued to the second flat face (9) of the first sheet element (10).
