Abstract (en)

[origin: EP2314513A1] The package has an oblong shaped body (1) comprising a fixed bottom situated at a distal end and a closing cover (2) situated at a proximal end. The body, bottom and cover are made of paperboard material. The cover is articulated and connected to the body via a hinge (8) situated at intersection of the cover and the body. The hinge is formed by a fold of the material, and the body includes a label (4) glued on a portion of external surface of the body. The label covers a portion of fold forming the hinge and a portion of external surface of the cover.
