Abstract (en)

[origin: EP2314785A1] The partition has a panel (12) extended in a vertical plane, where a support rail (14) is extended vertically between two ends of the partition. A fixation device (16) connects the support rail to a ceiling (24) or ground. A longitudinal section of the fixation device comprises a fixation part (18) in which the rail is fixed and another fixation part (20) formed in a ventilation sheath for delimiting passage adapted to air circulation of ventilation toward a ventilation device. An independent claim is also included for a building.
