Abstract (en)
[origin: WO2010010146A1] The invention relates to a domestic appliance, especially a dishwasher or washer, which comprises at least one control device (8) for controlling the device components of the domestic appliance that have electrical consumers during a program run. The domestic appliance is characterized by at least one switch (11, 31) for at least partially de-energizing the control device (8) once the program is completed.
