Abstract (en)

[origin: WO2010020431A1] The invention relates to a device for storing an independent tank (2) for cryogenic media, particularly LNG, in a vertical position in a ship (1) or a stationary facility (1). The device comprises a support for the tank (2), which supports the tank (2) on a corresponding foundation (10) of the ship (1) or the facility (1) through a thermally insulating layer (7) and which enables a horizontal relative motion between the tank (2) and the foundation (10).
