Abstract (en)

[origin: WO2010000872A1] The invention relates to an assembly device for a refrigeration unit fan. The assembly device includes: - a cover (35) bearing the fan (15); - an exchanger (13) including a wall (37), the cover (35) and the wall (37) forming two elements of the device, the first element (35) bearing against a first surface (41) of the second element (13); - a plurality of clamps (40) belonging to the first element (35) and bearing against a second surface (42) of the second element (13), the second surface (42) being opposite the first surface (41).
