Abstract (en)

[origin: WO2010023213A1] The invention relates to a method for identifying an object in a video archive including a plurality of images acquired by a camera network, which comprises a step of characterising the object to be identified and a step of searching for said object in said archive, wherein said characterisation step comprises determining for said object at least one extractable semantic characteristic of said video archive, even on low-resolution images.
