Abstract (en)
[origin: WO2010023095A1] A high-voltage power switch comprises a switch gap. The switch gap is surrounded by a nozzle (6) made of insulating material. The nozzle (6) made of insulating material comprises a switching gas channel (7). The switching gas channel (7) opens up into a storage volume (8). Disposed within the storage volume (8) is a flow steering apparatus (11a, 11b, 11c, 11d) that comprises a switching gas entrance channel (12a, 12b, 12c, 12d). Disposed between the wall in which the switching gas channel (7) opens up and a switching gas entrance channel wall that borders the switching gas channel (12a, 12b, 12c, 12d) is an annular gap (13).
