Abstract (en)
[origin: EP2316298A1] The object (1) has a case provided with a flexible type bracelet that is in a form of two bracelet strands (3). One of the strands is displacably mounted in a sliding manner with respect to the case to adjust length of the bracelet. A control unit (5) has a temperature sensor for measuring ambient temperature. The bracelet strands are fixed to the case by a pair of horns (4), where each horn has teeth (8). The horns are in a form of parallelepiped type longitudinal element.
