Abstract (en)  
[origin: WO2007124336A2] An elongated device for cutting media is provided. The device has a centerline axis along its length dividing it into first and second halves. The device includes (a) a handle having front and rear ends; (b) a head extending from the front end of the handle; and (c) a blade disposed in the head and having a cutting edge where a leading edge of the cutting edge intersects the top surface of a guide at a first reference point. The device further includes a guide, where the exit of the guide is asymmetric.
