Abstract (en)

[origin: EP2316742A1] The device has a rack including vertical corner posts (10-13). Adjacent corner posts are interconnected with each other in an upper area over transverse portions (20-23). Clothes rails (30, 31) are arranged between the opposing transverse portions. An additional rod (40) i.e. round profile, is attached between the adjacent corner posts below one of the transverse portions. Auxiliary rods (50-52) are pivoted around longitudinal axis of the additional rod. A locking unit locks the auxiliary rod in horizontal position. Notches (24, 25) are provided at transverse portions.
