Abstract (en)

[origin: US2011056229A1] The present invention relates to a subassembly element for a refrigerator unit and/or freezer unit, wherein the subassembly element has a front side, a rear side and two side regions, at least one air inlet and at least one air outlet, and wherein at least one air guidance means is provided in the subassembly element by means of which air can be guided from the air inlet to the air outlet in the subassembly element. The invention furthermore relates to a refrigerator unit and/or freezer unit.
