Abstract (en)
[origin: EP2317262A2] The tray i.e. pullout box (1), has a base plate (5) comprising an inclined surface (7) outwardly sloping to a water orifice (9), where dimension of the water orifice is small against dimension of the inclined surface towards gradients of the inclined surface. The base plate is made of glass, metal or ceramics, and another waterproof base plate (4) extends under the former base plate that is removable. Two spacers i.e. feet and ribs, are arranged between the base plates, and the water orifice is formed as a groove between one of the base plates and a side wall (3) of the tray.
