Abstract (en)

[origin: EP2317406A1] The system (9) has an integration device (11) on a pivoting axle (3) traversing a hole of a part e.g. spring, where the part is made of silicon based material. The integration device comprises a recess (4) connected with the hole of the part. An integration unit (6) is attached to the axle, where the unit partially adopts shape of the recess for integration of movement of the part with movement of the axle without pressing or bonding. An independent claim is also included for a method for fixing a part on a pivoting axle.
