Abstract (en)

[origin: WO2009135731A1] The present invention relates to a baby carrier comprising a harness (1) including a belt (3) and shoulder straps (5), and a pouch (2) to carry the baby, it being possible for the said pouch (2) to be attached to the said harness (1) using removable means of attachment (6). According to the invention, the harness (1) comprises first fastening means (8) designed to accept the said means of attachment (6), the said first fastening means (8) being designed to allow the pouch (2) to be switched from one of the positions, namely ventral and/or dorsal, to the other without having to modify the position of the harness (1) and without having to detach the pouch (2) from the harness (1).
