Abstract (en)
[origin: WO2010010063A1] The present invention relates to a device and a method for producing a coated material strip. The device comprises a conveyor (12), a painting device (20, 22) for applying a layer of paint onto the conveyor, followed in the production direction of the painting device (20, 22) by a cross-linking material application device (28, 30) for applying the cross-linking material onto the paint layer and then an uptake device disposed after the application device (28, 30) for taking up the product.
