Abstract (en)
[origin: WO2010023271A1] The present invention relates to a method for producing a polyurethane, which contains the process steps of: i) providing a polyisocyanate component containing at least one polyisocyanate, ii) providing a polyol component containing at least one polyether polyol, polyester polyol or a mixture of a polyether polyol and a polyester polyol, wherein the polyol component contains a polyester of a polyol and a monocarboxylic acid, iii) bringing the polyisocyanate component into contact with the polyol component with formation of a polyurethane. The invention also relates to the polyurethane obtainable by this process, a polyol component containing a polyether polyol, a polyester polyol or a mixture of a polyether polyol and a polyester polyol, a method for producing a polyol component, which contains a polyether polyol, a polyester polyol or a mixture of a polyether polyol and a polyester polyol, a polyol component obtainable by this method and containing a polyether polyol, a polyester polyol or a mixture of a polyether polyol and a polyester polyol, the use of this polyol component containing a polyether polyol, a polyester polyol or a mixture of a polyether polyol and a polyester polyol, as well as the use of a polyol ester.
