Abstract (en)

[origin: WO2010004170A1] Attachment of a rail to a track support equipped with a lateral shoulder using an elastic attachment device. The device comprises a lateral stop (19) interposed between the shoulder (15) and the edge of a flange (21) of the rail, a plate-like elastic attachment (23) and anchorage (27), the said lateral stop (19) comprising at its top a region of contact (33) for the elastic attachment in order to delineate the deformation thereof.
