Abstract (en)
[origin: WO2010011876A2] A system that unifies the management of ad insertion for IPTV, Cable, Satellite, Mobile, broadband delivery over any network (over-the-top), and social network delivery is presented. A system wherein ad management is abstracted from the delivery network and client devices. A system where ad management data is authenticated back to a root of trust and data is protected via authentication. One element of the invention provides for dynamic ad insertion and dynamic ad brokering across different delivery networks. Another element of the invention unifies ad insertion metadata and processing for STBs, PCs, mobile phones BluRay, game consoles, and any other type of client devices.
